Southern	81.1%	84.5%	▲	88.1%	88.3%	▲	74.3%	77.8%	▲	53.3%	59.2%	▲	53.2%	55.5%	▲

*Trend indicates changes in performance from Q3 (January to March) to Q4 (April to June) 2025/26 for most health targets - faster cancer treatment, improved immunisations, shorter waits for elective treatment, and shorter waits for first specialist assessments. For shorter stays in emergency departments, performance is compared with Q4 (April to June) 2024/25 to account for seasonal variation.
